

## PRESS RELEASE

### Garmin adds fēnix Chronos the refined GPS timepiece for Athletes and Adventurers

**SCHAFFHAUSEN, Switzerland, August 25, 2016** – Garmin International Inc., a unit of Garmin Ltd. (NASDAQ: GRMN), today announced fēnix Chronos, a refined timepiece that combines Garmin's profound experience in GPS powered navigation and sports instruments with a durable metal case of premium jeweler's grade materials in traditional watch making quality to define the next generation tool-watch. With three versions available: brushed titanium with hybrid titanium band; brushed steel with stainless steel bracelet; and brushed steel with vintage leather strap, there is a fēnix Chronos watch to suit every style and every adventure. "Garmin is the trusted choice for adventurers and athletes around the world for decades now" said Martin Resch, Senior Product Manager EMEA. "With Garmin quality cutting-edge sports and navigation features and premium materials fēnix Chronos is the ultimate authentic expression of your athletic and adventurous lifestyle no matter whether you climb the Alps, train for your first triathlon or at work.

With its rugged functional design in a refined metal case fēnix Chronos seamlessly transitions from a day on the trail or intense training session to an official event. The selection of styles and materials reflects Garmin's activity spectrum of exploration and performance sports. For rough expeditions that require uncompromised toughness fēnix Chronos holds a brushed 316L stainless steel case and two band variations, one in vintage-style leather with hand-sewn contrast stitching and a nubuck inner lining that combines classic good looks with lasting durability and comfort and one made of solid stainless steel links carefully assembled and hand-brushed to ensure a smooth, consistent texture. To meet the expectations of high-performance athletes fēnix Chronos also features a light but extremely durable version with a brushed titanium housing and an innovative titanium hybrid band. Its individually brushed forged titanium links and black elastomer inner links make it strong yet extremely lightweight and comfortable to be worn during any kind of demanding activity.

Fēnix Chronos has been developed to complete the mission, all models have a high-strength and scratch-resistant sapphire watch glass and an always on 1.2-inch Chroma Display optimized for best outdoor readability under any conditions, even in direct sunlight. With up to 25 hours of battery life in UltraTrac battery saving mode, up to 13 hours in GPS mode and up to one week in smart connected mode (depending on settings) fēnix Chronos is an enduring partner. The watches are rated as 10ATM (100m)<sup>2</sup>water resistant and their rugged build is designed to last.

Leveraging the experience of the popular fēnix 3 line, fēnix Chronos boasts a multisport and navigational toolset that really matters for athletes and adventurers today. The metal EXO antenna with high performance GPS and GLONASS satellite reception, advanced ABC sensors (altimeter, barometer, compass) and Garmin Elevate™ wrist heart rate technology allow users to track and measure performance data during their outdoor and sports activities at any time they want. To give users the chance of exploring all kind of activities with fēnix Chronos, the watch comes preloaded with dedicated activity profiles and features for many activities like running, cycling, hiking, swimming, rowing, trail running, skiing, triathlon, golf and more. And once their activity leads them off the beaten track, well proven and reliable Garmin navigation features like TracBack guide them back home safely.

For ambitious athletes fēnix Chronos even supports additional advanced performance features like advanced running metrics, VO2max recovery guidance, wireless connectivity to additional optional sports sensors via ANT+ and further physiological data that supports them in making their training more efficient and helps to keep them motivated while they progress.

The fēnix Chronos is available in three luxurious versions: brushed titanium with hybrid titanium band; brushed steel with stainless steel bracelet or with vintage leather strap.

With Garmin Elevate™, this refined timepiece measures the heart rate at the wrist all day and night.

## PRESS RELEASE

Smart connectivity and features that really matter turn fēnix Chronos into a smart tool that enhances your modern connected life no matter whether you are on a weekend hike or during your daily business routine. Via the Connect IQ app store integrated in the Garmin Connect mobile app, users can download free apps, widgets, watch faces and data fields to personalize the watch to their individual needs. Additionally, users can receive smart notifications like incoming calls, SMS, email, social media posts and other alerts right on their wrist. They get updated on the latest weather changes on the go or share their activity live with others with LiveTrack once the watch is paired with a compatible smart phone. fēnix Chronos is also equipped with daily activity tracking<sup>3</sup> technology, so users can monitor the number of steps taken, calories burned, stairs climbed, and quality of rest at night with the sleep mode.

Fēnix Chronos is available now. Fēnix Chronos titanium with titanium band will have a suggested retail price of €1.299,99; fēnix Chronos steel with stainless steel band will have a suggested retail price of €1.099,99; fēnix Chronos steel with leather band will have a suggested retail price of €999,99.

The fēnix Chronos is the latest solution from Garmin's expanding wearable product lineup, which focuses on developing technologies and innovations to enhance users' sport and outdoor experiences.
