

keezel

online freedom, everywhere
media kit

NEW

keeze! home connect

Protect your IoT and smart devices.

Keep your unsecured devices on a separate network.

Connect any WiFi smart lock, smart TV, baby monitor, smart garden sprinkler, or thermostat.

Prevent hackers from entering your Baby Monitor through the weakest link.

The Keezel device

secure & portable

The Keezel is a portable personal device that enables users to connect to any Wi-Fi internet connection with the protection of a VPN.

The device is a user-friendly hotspot that, as hardware, offers more security and flexibility than traditional VPN software.

Keezel's open source technology is powered by a dual-core ARM processor with a 8000+mAh battery, a USB host port and a Micro USB charging port.

Keezel network

world's leading VPNs

Keezel is partners with the best VPN providers on the market, including PureVPN, Le VPN, and ProVPN, to bring users better connections with speed, geographic reach and resilience.

For the first time, users can connect to a combined network of over 1250 servers in more than 160 countries for an unprecedented VPN experience.

Users can also integrate the Keezel Home Connect to create a VPN connection to their home network while traveling or secure all their IoT/home automation devices by putting them on a separate, private network.

Security

Use The Keezel to ensure a secure connection on any device while traveling. The Keezel blocks third parties to keep your device safe from malicious hackers, protecting against credit card fraud, identity theft and theft of client data.

Privacy

The Keezel's VPN setup stops your provider and wireless network providers, like coffee shops, hotels and airports, from monitoring your activity.

Circumvent censorship

Check your social media and watch your favorite TV shows and sports teams no matter where travels take you. Say goodbye to blocked sites, with access to every site wherever you may be in the world.

Protect all your devices at the same time

The Keezel protects all your devices at the same time, with no additional setup, so your Android or iOS cell phone, laptop, and tablet are all protected wherever you go and work.

Charge your devices

Charge your mobile devices while commuting with The Keezel.

Enhance Wi-Fi

Whether you are working in a coffee shop, on the train or in the comfort of your own home, The Keezel is the solution. Create a Wi-Fi network or enhance your current one with The Keezel for the best experience.

keezel

executive bios

Aike Müller

Aike Müller is co-founder of Keezel and a skilled inventor with several companies under his belt. Aike's career in information management and IT security began as an M&A IT expert at PwC. He went on to co-found a government-contract consulting firm specializing in automated assurance. As a freelance consultant, Aike worked on process and supply chain assurance for national and international clients in logistics, retail and sustainable agriculture. He developed the Keezel as a solution to security issues he encountered while working at client locations. Outside of Keezel, Aike enjoys brewing craft beer at his brewery.

Friso Schmid

Friso Schmid is co-founder and the business strategist of Keezel. He started his career as an IT consultant at Capgemini, where he worked with national and international clients. Friso left Capgemini to join the government-contract consulting firm with Aike. When it was time to move on to his next project, Friso founded a company that developed a Big Data recommendation engine matching candidates with companies. Friso and Aike rejoined in 2013 to work on the early version of the Keezel and prepare for the crowdfunding campaign. Outside of Keezel, Friso plays keys in the Dutch indie band Maggie Brown. On a given night you can catch him performing in Amsterdam.
